Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the second non-final Office Action for application number 10/802,905 Adjustable Beverage Holder, filed on 3/17/04. Claims 23-31 are pending. This is the second non-final Action in response to applicant's reply dated 1/27/06. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-31 are rejected under 35 U.S.C. 102(e) as being anticipated by United States Patent No. 6843397 to Then et al.

The patent to Then et al. discloses a holder (1) for supporting an article having a housing (3) with an opening (4), the housing having a support surface (8), a plurality of leaf members (5) supported on the housing (3) for pivotal movement relative to the support surface and an actuating mechanism (13-17) supported on the housing (3) that is moveable relative to the support surface for causing movement of the plurality of leaf members, whereby the plurality of leaf members can be moved to engage an article

Art Unit: 3632

supported on the support surface. Then et al. also teaches that each of the plurality of leaf members includes a screw flight (18.1) and wherein the actuating mechanism cooperates with each of the screw flights (18.1) to cause movement of the leaf members and wherein the actuating mechanism includes a plurality of slots (See Drawing Below, indicating the open area for each screw flight) that respectively cooperate with each of the screw flights.

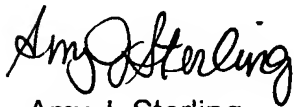

Response to Arguments

The applicant has argued that the Withun et al. reference did not show an actuating mechanism for causing movement, but more of a reaction mechanism. This is persuasive and finality is withdrawn. All other arguments are moot in view of the new grounds for rejection recited above.

Conclusion
